PROJECTS

Sales Performance Dashboard | Power BI | SQL | Excel

Personal Project | 2024

- Designed an interactive Power BI dashboard analyzing 50,000+ sales records across regions and product categories.
- Wrote optimized SQL queries to extract, clean, and transform raw transactional data from a relational database.
- Identified top 5 revenue-generating products and seasonal trends, enabling simulated 15% revenue insight improvement.
- Published report with drill-through filters, KPI cards, and slicers for dynamic stakeholder-friendly storytelling.

Customer Churn Prediction | Python | EDA | Feature Engineering

Personal Project | 2024

- Performed end-to-end EDA on a telecom dataset of 7,000+ customers using Python (Pandas, Seaborn, Matplotlib).
- Applied feature engineering techniques including encoding, scaling, and correlation analysis to prepare model-ready data.
- Visualized churn patterns by contract type, tenure, and monthly charges; documented findings in a Jupyter Notebook.
- Achieved clean, interpretable insights to assist hypothetical business teams in reducing customer attrition.
